## UX/UI Designer

### Montreal, Qc

---

#### Overview

Our client is a dynamic and growing company offering web solutions in the field of logistics and supply chain. The Company has gained the confidence of clients around the world and across many industries including retail, grocery, distribution, manufacturing and parcel post. As a key member of the Product team, you will be responsible for defining the user experience for our SaaS enterprise application by working closely with the product, implementation, marketing, and sales teams.

The ideal candidate is customer-centric and continually mastering and incorporating the latest UX and UI design practices. He/she is proficient in using multiple design tools and enjoys solving high impact, difficult design challenges. We are looking for a confident individual who possesses a strong work ethic, focused on innovation, and personal growth. You must be capable of juggling multiple tasks and delivering results on-time by working with cross-functional teams.

#### What You Will Do

- Oversee the end-to-end design of customer-facing UIs.
- Design mockups and prototypes for new products and features.
- Work with cross-functional teams, especially Product Team and Implementation to create specs for development.
- Define and maintain user flows, feature sets, and application UI standards in collaboration with the Product Team.
- Perform usability testing.
- Leverage modern web technologies to define innovative user interfaces and interaction models that result in improved user productivity and operational efficiency.
- Collaborate with the customer care department to get user experience feedback from customers.
- Work with our branding specialist and ensure a consistent look and feel throughout our solution.

#### Skills & Qualifications

- Customer-oriented approach.
- Interest in continuous improvement.
- Strong sense of ownership and autonomy.
- Outstanding interpersonal, verbal and writing/presentation skills.
- Positive attitude, collaborative, adaptable, resourceful, and motivated.
- Excited to follow the UX industry's latest trends and technologies.
- Team-player mindset, comfortable working in a multi-disciplinary team.
- Facility to articulate design processes, ideas, and solutions.
- Degree in a related field.
- Minimum of 3 years of experience in design complex enterprise-level SaaS applications.
- Excellent in English (spoken and written).

- Good in French (spoken and written).
- Track record of developing and delivering successful, intuitive, and compelling designs.
- Deep knowledge of user-centric design processes and methodologies.
- Experience working in an agile framework.
- Experience collaborating with multi-disciplinary teams to successfully develop and deliver high-end user interfaces on schedule.
- Understanding of modern web/app design standards including responsive design.
- Experience developing user flows, wireframes, and high-quality UI's.
- Experienced in usability testing.
